Career Objective

To work in a reputable organization and provide maximum contribution to the achievement of the organization's efficiency and effectiveness at all technological levels.

Professional Profile

Enthusiastic Computer Scientist with expertise in networking(Data communication, Huawei), programming Languages ie: Java, JavaScript, Express, Node, React, HTML, and CSS, machine learning model training (Python), web development, and cloud computing. Collaborated on the I.S.A.S (IoT Smart Agriculture System) project, contributing to machine learning, sensor assembly, and micro controller programming.

Key Competencies

1. **Front-End Development:** HTML, CSS, JavaScript, React, Chakra UI
2. **Backend Integration:** RESTful API, Node.js, Express, SQL
3. **Software Development:** Full-stack development using Prisma ORM
4. **Machine Learning & IoT:** TensorFlow, OpenCV, Arduino, Raspberry Pi
5. **Cloud & Deployment:** AWS, Docker, GitHub, Digital Ocean
6. **Data Management:** MySQL, PostgreSQL, database optimization

Education

Professional qualifications

From	To	Institution
2021	2024	Laikipia University

Qualifications

Bachelor of Science in Computer Science

Academic qualifications

From	To	Institution	Qualifications
2016	2019	Kalulini Boys High School	K.C.S. E-Mean Grade B-
2012	2016	Kiaoni Mixed-Boarding Primary School	K.C.P. E-Marks 335/500

Professional Experience

Teaching Assistant - Data Communication Practical Sessions

Laikipia University

- Conducted and facilitated practical networking sessions in data communication, enhancing students' understanding and application of theoretical knowledge.

Attachment - Teach2Give

May 2024 - July 2024

- Completed an attachment in software development, gaining experience in HTML, CSS, JavaScript, Node.js, Express.js, React, Docker, and GitHub.

- Successfully built a Learning Management System from scratch, incorporating a user-friendly front end, API data fetching, and backend integration with Express.

Commissioner - 2023/2024 Elections

Laikipia University

- Organized and oversaw election processes, demonstrating strong problem-solving, organizational skills, and teamwork in a challenging environment.

Technical Projects

1. Student Movement Tracking System

Developed a system using GPS and RFID to monitor student movement within a school compound. Integrated front-end features for parent notifications on student check-ins and check-outs, demonstrating proficiency in React and backend API integration.

2. Parking Solution Platform

Built a front-end for a parking reservation system using React, displaying parking slots available in malls, slot reservation, and M-Pesa payment integration. Implemented real-time slot availability with SQL and Prisma ORM on the backend.

3. Gate Management System (Secure Pass)

Created a secure gate management system using machine learning for facial recognition and license plate detection, with an IoT interface for real-time access tracking. Utilized OpenCV, Node.js, and Express for a fully functional entry/exit monitoring system.

4. Kenya Airways Sentiment Analysis

Developed a sentiment analysis system for social media data, scraping Twitter data, analyzing sentiments, and integrating a SQL database using Prisma ORM and Express.js. Built a front-end dashboard for real-time sentiment tracking and data visualization.

5. IoT Smart Agriculture System (I.S.A.S)

Collaborated on the IoT Smart Agriculture System project, where I contributed to machine learning model training, sensor assembly, and programming of Arduino Uno and Raspberry Pi, enhancing my skills in IoT applications.

Soft Skills

- **Communication:** Effective written and verbal communication for technical documentation and collaboration.
- **Problem Solving:** Strong analytical skills for debugging and optimizing application performance.
- **Adaptability:** Eagerness to learn new technologies and apply them effectively within team environments.
